GOLDJAXE

MODELS REGISTRY

No. REG-FZ-TG-2026-1008

THIRD-PARTY MODELS REGISTRY & TERMS · VERSION 2.2 · 16 OCTOBER 2026

Every model in Terminal GOLDJAXE, with its provider, its channel and the rules that travel with it

Each model runs under the terms of its provider, which apply in place of ours wherever they are stricter. The customer chooses which data goes to which model through the Model Router and **bears the risk of everything it sends**

APPLIES TO

Customers choosing a model
through the Model Router
of Terminal GOLDJAXE

MODEL FAMILIES	ACCESS CHANNELS	PROVIDER TERMS	RISK OF INPUTS
4 cloud + open	4	stricter prevail	customer

Contents

Section 1 explains how the Registry works and when its updates apply. Section 2 sets out Customer's choice of Model and the risk that comes with it. Sections 3–4 list the cloud models, their providers, access channels and terms. Sections 5–6 cover open models and the GOLDJAXE Model. Sections 7–8 cover availability by country and organisation and GOLDJAXE's responsibility for third-party models. Sections 9–10 cover trademarks and versions

This Third-Party Models Registry & Terms (the **"Registry"**) is published by **GOLDJAXE L.L.C-FZ**, a limited liability company licensed in Meydan Free Zone, Dubai, United Arab Emirates, under Trade License No. 2654905.01, with its registered address at Meydan Grandstand, 6th floor, Meydan Road, Nad Al Sheba, Dubai, U.A.E. (**"GOLDJAXE"**), for Terminal GOLDJAXE (the **"Service"**). It forms part of the Agreement under the Terms of Service for Business and uses the terms defined in section 2 of those Terms. Each link leads to the current version of the document; the version in force at the time of use applies.

01

How the Registry works

1.1 For each Model, the Registry lists its Model Provider, the channels through which GOLDJAXE accesses it and its Provider Terms, as section 2 of the Terms of Service for Business defines them.

1.2 By selecting or using a Model, Customer accepts its Provider Terms for itself, its Authorised Users and its End Users. Provider Terms apply only when that Model is used.

1.3 Where Provider Terms are stricter than the Terms of Service for Business, the Acceptable Use Policy or this Registry, the Provider Terms apply to the use of that Model in place of them, in line with section 4.3 of the Terms of Service for Business.

1.4 GOLDJAXE updates the Registry when Model Providers change their Models, terms or availability, when the law requires it, and when GOLDJAXE adds, replaces or retires a Model. GOLDJAXE publishes each update on the Site and notifies Customer through the Service or by email; the update applies from its publication, unless the notice states a later date. A change that a Model Provider makes to its Provider Terms applies from the date the Model Provider sets. If Customer does not accept an update or a change, its sole remedy is to stop using the affected Model, and use of the Model after the update or change applies constitutes acceptance. Credits remain available for the other Models during the term of the Order Form.

1.5 GOLDJAXE accesses Third-Party Models under commercial agreements or paid service tiers that permit their use inside the Service, and provides Terminal GOLDJAXE as an integrated product. Standalone access to the API of a Model Provider is outside the Service.

1.6 The rows on access, data use and model rules in this Registry summarise the Provider Terms for convenience. The Provider Terms prevail over any summary, and GOLDJAXE gives no assurance that a summary is complete or current.

02

Customer’s choice of Model and its risk

2.1 Customer chooses the Models it enables, the channel and operating mode for each Model and the Model Router rules that decide which data goes to which Model, and decides whether each Model and its Provider Terms suit its use case, including any regulated, high-risk, sensitive or customer-facing use.

2.2 Customer bears the entire risk of everything that it, its Authorised Users and its End Users send to a Model that Customer has enabled or allowed by its Model Router rules, including Inputs, files, confidential information and personal data, and of how the Model Provider processes, stores, reviews and uses that content under its Provider Terms, including for abuse detection and, where its Provider Terms allow, for improving its services and models.

2.3 GOLDJAXE has no obligation to review the content that Customer sends to a Model and makes no representation or warranty regarding any Model Provider's data handling, retention, training, security, availability or intellectual property practices.

2.4 Where Customer uses a Customer Key, Customer contracts directly with that Model Provider, and the terms between them govern data use, availability and charges; GOLDJAXE's fees for the Service apply in addition,

as section 3.4 of the Terms of Service for Business provides. For that use, the Service acts as software that sends Customer's requests on Customer's instructions.

03

Cloud models

Claude · Anthropic

ITEM	DETAILS
Access channels	Anthropic API under a direct commercial agreement · Amazon Bedrock · Microsoft Foundry · Google Cloud Gemini Enterprise Agent Platform (Vertex AI)
Terms	Commercial Terms of Service — anthropic.com/legal/commercial-terms
Usage policy	Usage Policy — anthropic.com/legal/aup
Availability	Supported countries and regions — anthropic.com/supported-countries
Data use	the Commercial Terms state that Anthropic may not train models on customer content from its services
Model rules	in high-risk use cases, a qualified professional reviews content before it reaches a person and AI use is disclosed; consumer-facing chatbots disclose that they are AI

GPT · OpenAI

ITEM	DETAILS
Access channels	OpenAI API under a direct commercial agreement · Microsoft Foundry (Azure OpenAI)
Terms	OpenAI Services Agreement — openai.com/policies/services-agreement
Usage policy	Usage Policies — openai.com/policies/usage-policies

ITEM	DETAILS
Availability	Supported countries and territories — developers.openai.com/api/docs/supported-countries
Data use	the Services Agreement states that OpenAI does not use customer content to develop or improve its services unless the customer explicitly agrees
Model rules	minors use the services only with the consent of a parent or guardian; Outputs are not used to develop AI models that compete with OpenAI

Gemini · Google

ITEM	DETAILS
Access channels	Gemini API, paid tier, under a direct agreement · Google Cloud Gemini Enterprise Agent Platform (Vertex AI)
Terms	Gemini API Additional Terms of Service — ai.google.dev/gemini-api/terms, together with the Google APIs Terms of Service — developers.google.com/terms
Usage policy	Generative AI Prohibited Use Policy — policies.google.com/terms/generative-ai/use-policy
Availability	Available regions — ai.google.dev/gemini-api/docs/available-regions
Data use	for paid services, Google states that it does not use prompts or responses to improve its products and logs them for a limited period solely to detect and prevent violations of its Prohibited Use Policy and for required legal or regulatory disclosures; GOLDJAXE uses the paid tier only
Model rules	users are 18 or older; services directed to or likely to be accessed by persons under 18, clinical practice, medical advice and uses overseen by or requiring clearance from a medical device regulatory agency are excluded

Kimi · Moonshot AI

ITEM	DETAILS
Access channel	Kimi OpenPlatform API under a direct agreement
Terms and usage rules	Terms of Service for Kimi OpenPlatform — platform.kimi.ai/docs/agreement/modeluse
Privacy	Kimi OpenPlatform Privacy Policy — platform.kimi.ai/docs/agreement/userprivacy
Availability	its terms exclude use in or for countries and regions under comprehensive sanctions and by persons on restricted or denied party lists
Data use	under its terms, Moonshot AI may use content, including Inputs and Outputs, to provide, maintain, develop, support and improve its services, including for training and improving its models, unless a separate written agreement restricts this; Customer decides through the Model Router which data goes to Kimi and bears the risk of that choice
Model rules	Outputs relating to a person are not used for credit, educational, employment, housing, insurance, legal, medical or other important decisions about that person; no personal information of children under 14 or under the applicable age of digital consent; no protected health information under the HIPAA Privacy Rule

Further cloud models

GOLDJAXE adds further Third-Party Models to the Registry, with their Model Provider, access channel and Provider Terms, before making them available in the Service.

04

Access channels

4.1 When GOLDJAXE accesses a Model through a cloud platform, the terms of that platform apply together with the terms that the Model Provider sets for the platform.

CHANNEL	TERMS THAT ALSO APPLY
Direct API	the commercial terms of the Model Provider, listed in section 3
Amazon Bedrock · Amazon Web Services	AWS Service Terms, Amazon Bedrock section — aws.amazon.com/service-terms · AWS Acceptable Use Policy — aws.amazon.com/aup · AWS Responsible AI Policy — aws.amazon.com/ai/responsible-ai/policy · third-party model terms — aws.amazon.com/legal/bedrock/third-party-models
Microsoft Foundry · Microsoft	Microsoft Product Terms — microsoft.com/licensing/terms · Code of Conduct for Microsoft AI Services — learn.microsoft.com/en-us/legal/ai-code-of-conduct
Gemini Enterprise Agent Platform (Vertex AI) · Google Cloud	Google Cloud Platform Terms of Service — cloud.google.com/terms · Service Specific Terms — cloud.google.com/terms/service-terms · Google Cloud Acceptable Use Policy — cloud.google.com/terms/aup · Generative AI Prohibited Use Policy

4.2 AWS states that, for certain models it identifies, Amazon Bedrock stores inputs and outputs for up to 30 days solely to detect activity that violates its terms or the terms of third-party model providers, and may review them if it detects a potential violation.

05

Open models

5.1 Open Models run in GOLDJAXE Perimeter or in Your Perimeter under the licence of each model — such as the MIT License and the Apache License 2.0 — together with any use restrictions that the licence contains.

5.2 The licence of each Open Model deployed for a Customer is named in the Order Form or in the NOTICE file of the deployment. Licence texts: MIT License — opensource.org/license/mit; Apache License 2.0 — apache.org/licenses/LICENSE-2.0.

5.3 Open Models are provided "as is", with only the commitments that their licences give.

5.4 In Your Perimeter, GOLDJAXE is responsible only for its own software and services under the Software License (Your Perimeter) and IT AMC Agreement (the "Perimeter Terms").

06

GOLDJAXE Model

6.1 The GOLDJAXE Model becomes available when GOLDJAXE adds it to this Registry together with the licence and usage policy under which GOLDJAXE provides it, as section 4.9 of the Terms of Service for Business provides.

6.2 GOLDJAXE does not use Third-Party Outputs, or logs and synthetic data that contain or are derived from them, to develop or train the GOLDJAXE Model or any other model, as section 7.6 of the Terms of Service for Business provides.

07

Availability by country and organisation

7.1 GOLDJAXE provides each Third-Party Model only for the countries, regions and organisations that its Model Provider supports, under the availability rules in section 3 and the regional rules of each access channel.

7.2 A Model that its Model Provider does not make available for Customer's country, or for Customer as an organisation, including by reason of its place of incorporation, ownership or control, is not provided to Customer, and GOLDJAXE may withdraw it at any time without notice where the Model Provider or the law requires. Open Models in GOLDJAXE Perimeter or Your Perimeter remain available under their licences, subject to section 15 of the Terms of Service for Business.

7.3 Model Providers may change their lists of supported countries and restricted organisations at any time, with or without notice, and GOLDJAXE follows those changes. Customer gives the sanctions and export control representations in section 15 of the Terms of Service for Business.

08

Responsibility for third-party models

8.1 Third-Party Models are provided "as is" and "as available", with only the commitments that their Model Providers give. GOLDJAXE does not warrant, and is not responsible for, the availability, performance, speed, accuracy, quality or continuity of any Third-Party Model, or for any change that a Model Provider makes to a Model, its Provider Terms, its prices or its availability, as section 12.5 of the Terms of Service for Business also provides.

8.2 A Model Provider may change, limit, suspend or retire a Model at any time, and retains sole control over access to its Model. GOLDJAXE may then replace the Model with another Model or remove it from the Service. A change, substitution, suspension or removal of a Third-Party Model is not a failure by GOLDJAXE to provide the Service or a breach of the Agreement, and Customer's sole remedy is to use the other Models, for which its Credits remain available during the term of the Order Form, in line with sections 3.5 and 4.6 of the Terms of Service for Business.

09

Trademarks

9.1 Model and provider names are trademarks of their owners. They appear in the Registry and in the Service to identify the Models, and their use implies no endorsement by or affiliation with the Model Providers.

10

Versions

VERSION	DATE	CHANGE
2.0	8 October 2026	Claude, GPT, Gemini and Kimi; four access channels; Customer's choice and risk of inputs; Provider Terms in place of ours where stricter; updates from publication; limits of GOLDJAXE's responsibility; open models; the GOLDJAXE Model on release
2.1	16 October 2026	Details of GOLDJAXE L.L.C-FZ under its trade licence
2.2	16 October 2026	Sole remedy in section 8.2; terms of the GOLDJAXE Model set on its release; no training on Third-Party Outputs (section 6.2); definitions and provider channels aligned with the Terms of Service for Business
